

<https://acidfumeextraction.com/>

**Acid fume** capture and abatement is a momentous characteristic in every **hot dip galvanizing plant**. **Acid Fume Extraction systems** soak up the acidic/toxic fumes from the pickling tanks and thereby avert the toxic fumes from spreading on the floor and from causing pollution. **Acid fume extraction system** is used to take the toxic/acidic fumes away from pickling tanks and avoid them from spreading on the shop floor and cause pollution. We have productively become one of the leading fume extraction system manufacturers and suppliers in India as our products can be designed to meet detailed high demanding emission regulations. We provide complete equipment supply and engineering services to give high quality fume extractors at a low price. We support our customers with installation, start-up assistance, training and field service of chemical fume extractors. We are most demanded brand and recognized **Manufacturer, Supplier, Exporter in India**
